

# KOZHI (\$KOZHI) Whitepaper V01

**Tagline: Kokarako Koooo!**

**Blockchain: Solana Mainnet**

**Token Type: SPL Fungible Token**

**Status: Public Release**

## 1. Executive Summary

KOZHI (\$KOZHI) is a community-driven memecoin launched on the Solana blockchain, inspired by the cultural vibrancy of Kerala, India. The word “Kozhi” translates to “rooster” in Malayalam, symbolizing energy, alertness, and unapologetic noise.

\$KOZHI is intentionally positioned as a pure memecoin, focusing on transparency, fairness, cultural identity, and strong community participation.

## 2. Introduction

KOZHI (\$KOZHI) embraces honesty and simplicity. It does not claim to solve complex technical problems or replace financial systems. It exists to unite a global community around humor, memes, and decentralized participation.

## 3. Market Problem

The memecoin market is oversaturated with repetitive themes, poor transparency, hidden token mechanics, and abandoned communities.

## 4. The KOZHI Solution

- Fixed supply with mint authority revoked
- Zero transaction taxes
- No freeze authority
- Burned liquidity
- Transparent communication

## 5. Blockchain & Technology

Blockchain: Solana Mainnet
